

# Front end development: For Loop

---

JavaScript – simple for loop

- for loop

## Instructions

Create array with numbers :

```
const arr = [1,7,3,0,-5,7,3,9];
```

1. Print with for loop all the number.
2. Create function “arrayLength” that return the array length (don’t use arr.length)
3. Create function “arraySum” , the function return the sum of all elements in array.
4. Create function “arrayMulti” , the function return the multiplication of all the elements in array.
