Website Building: Layout with Floats

HTML – Float Layout

The following exercise contains the following subjects:

- ◆ floats
- ◆ padding
- ◆ margin
- ◆ text-align

Instructions

Recreate the layout below using floats.

All elements needs to be semantic!

Pay attention on how all the elements are in the middle of the page, the empty space inside the elements, between the elements and the positioning of the titles.

Make also sure that when you resize your view port the elements won't over flow from the page.

Tip:

CSS calc() function may help you here

	Header	
Side	Main	
	Footer
